

West Lake Energy Corp. is a privately owned, intermediate producer with core assets located in the Lloydminster and Provost areas. West Lake's strategy is to grow its production base in both its heavy and medium areas through organic drilling. West Lake has applied advanced drilling and completion techniques, which has allowed its wells to achieve compelling economic returns at sustained low oil prices. West Lake continues to execute on a material multi-year drilling program.

We are currently recruiting for an **Asset Integrity Technologist** in our Lloydminster Office. Reporting directly to the Team Lead, Facilities Engineering this role provides the opportunity to be involved in a full range of responsibilities including the following:

ACCOUNTABILITIES:

- Manage the Corporate Pipeline, Tank and Pressure Vessel Integrity Management Programs.
- Provide training to operations staff on regulatory compliance, and supporting the West Lake Energy Pipeline, Tank and Pressure Vessel Equipment Integrity Programs.

RESPONSIBILITIES:

- Provide front-line technical support for West Lake Energy on issues related to corrosion, inspection, repair, and all equipment integrity-related regulatory issues.
- Identify candidate pipelines for abandonment or discontinuation.
- Work with operations to co-ordinate all field activities relating to the suspension, reactivation and evaluation of pipelines systems.
- Liaise with regulatory authorities, integrity vendors, engineering contractors, and inspection contractors to manage integrity related issues.
- Ensure that inspection requirements are clearly defined prior to performing inspections by defining the extent of inspection and Non-Destructive Examination (NDE) required as part of the work scope development.
- Work with operations staff on planning and scheduling plant turnarounds, and coordinating preventative maintenance activities to minimize production losses.
- Promote, participate and make use of Near Miss reports, Work Site Hazard Assessments, Worksite Observations, Safety Meetings and Safety Audit inspections to ensure the highest standards for the Company and contractors.
- Work with the Chief Inspector on inspections and repairs of pressure equipment.
- Advise operations on B31.3 repairs and coordinate vendors to do the required work.

QUALIFICATIONS:

- 8-10 years of field based asset integrity experience or oil and gas operations/maintenance experience.
- Mechanical, Materials or Metallurgical technologist diploma.
- A Class 5 driver's license
- Strong knowledge of Alberta and Saskatchewan's oil and gas regulations, guides and industry recommended practices.
- In-Service Inspection with AP1 510 certification.

- Excellent communication, organizational and team working skills complemented by a strong work ethic

If you are interested in this career opportunity, please submit a resume to HR@westlakeenergy.ca no later than January 28, 2019. Please include the job title in the subject heading.

West Lake Energy thanks all applicants for their interest but only candidates chosen for an interview will be contacted.
